

Sample of 2026 GO Bond 3 Letter to Superintendents of Area Schools

Date

Name and Address of Superintendent

Dear *(name of superintendent)*,

As *(title) of (university/college/school)*, I am asking your support in distributing the enclosed information to your employees about the GO Bond 3 for Higher Education in the November 2026 General Election. Our students (and your graduates) are the real recipients of the funding provided by GO Bond 3. The more current we keep our educational facilities, the better the educational experience for these students.

(Name of your school) will receive *(Project cost)* for the *(project description)*. Statewide, higher education institutions will receive more than \$351.57 million to renovate, replace and upgrade educational facilities and agricultural science and research centers in 25 communities in 22 counties.

Campus improvements help *(your school)* remain competitive with other New Mexico and out-of-state schools and make our institution more attractive to our local area high school graduates. Passage of GO Bond 3 will also help us fight the “brain drain” by helping keep strong students in our state.

Ensuring higher education institutions in New Mexico are competitive encourages more area graduating high school seniors to remain in New Mexico to attend college. After graduation, they often stay in state to pursue careers and further contribute to the vitality of the area. With a larger tax base, tax rates can be kept lower while community assets such as public schools can be better funded.

Passage of GO Bond 3 will cause **no tax rate increase for homeowners** as verified by the State Department of Finance and Administration. *(Project cost)* in our county will also mean MORE JOBS in our part of New Mexico and will help to sustain our construction industry.

Thank you for helping ensure the future of *(school name)* by distributing this information to your employees. Please contact me if you have any questions.

Sincerely,

Title
